IACUC Policies and Guidelines

IACUC is an Institutional Animal Care and Use Committee. IACUC’s are mandated by two different federal laws, the *Animal Welfare Act* [1] and the *Health Research Extension Act* [2].

**Policy and Procedure Manual Sections Relating to IACUC**

- Section 290-30 [3] Use and Care of Animals in Teaching and Research
- Section 290-25 [4] Health Services for Individuals Having Animal Contact

**Background**

These statements of policy address areas in which federal laws or the guidelines of granting agencies are somewhat unclear. The IACUC has tried to create a clear statement of policy in these areas to help researchers understand what is expected of them and to make certain that all researchers are treated equitably.
