Come enjoy nature and learn some gardening skills! Discover the wonders of the Arboretum while gaining practical planting and propagation skills.

October 5 – PLANT PROPAGATION: DIVISIONS (Arboretum Teaching Nursery)
Tune in to the season and the way plants grow as we learn the basics of dividing plants. Participants will get to take a plant division with them.

October 12 – PLANTING IN THE ARBORETUM (Mrak Circle - meet by the eggheads)
Come clear your head and get your hands dirty by planting plants that you and other Arboretum visitors will enjoy year after year.

October 19 – MINI SUCCULENT GARDENS (Arboretum Teaching Nursery)
Create succulent gardens that you can keep on your desk or on your windowsill to remind you of the beauty of nature.
