October is BioSafety Month

At UC Davis, we celebrate BioSafety Month by promoting biosafety in and outside the lab.

Each week the BioSafety Team will highlight safe research practices for professionals working with biological materials. This year, we'll focus on the following areas, offering tools, tips, guidelines and freebies that can help you to Think Safe, Act Safe and Be Safe when working with biohazardous materials. Email us with questions at biosafety@ucdavis.edu [1]
