Please use the tips below as you drive, bike, and walk during the rainy months of the year, to stay safe as you travel to and from the University. We want to empower our community to prepare for wet conditions, and avoid hazardous conditions that affect our campus.

**DRIVING**
- Slow down to increase your traction
- Avoid driving through deep puddles or flowing water
- When visibility is poor, turn on your lights and signal well in advance

**CYCLING**
- Avoid potholes and debris
- Control your speed and avoid quick braking
- Become more visible by using lights, wearing bright clothing, and riding more consistently and predictably

**WALKING**
- Avoid distractions
- Use sidewalks and be cautious at intersections
- Please use handrails when ascending and descending stairs
